ACT Pex Compression COMPAX Manifolds

Fits ASTM 876/877 Pex Piping

1" Header with high temperature brazed 1/2" outlets (notched out for better flow), 2" On Center with Compax Fittings soldered on.

Available with 2, 3, or 4 outlets, one end expanded to coupling size, other end straight.

These are made from high quality type L copper.

Compax = Screw Compression Pex Fittings

Only Tool needed to attach pex is a wrench!

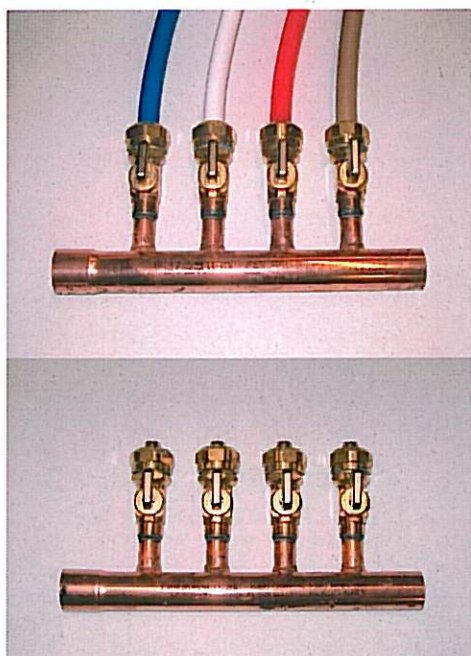

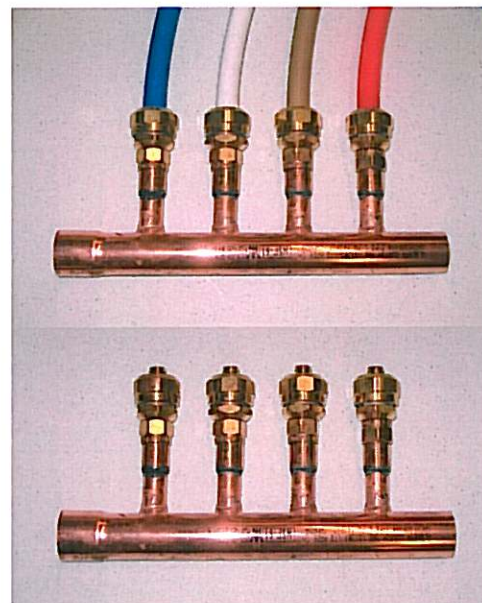

ASTM 876/877 F1807 Fittings

Part #'s

CACX1005002 = 2 outlet Compax fitting manifold

CACX1005003 = 3 outlet Compax fitting manifold

CACX1005004 = 4 outlet Compax fitting manifold

1" Header with high temperature brazed 1/2" outlets (notched out for better flow), 2" On Center with Compax Valves soldered on.

Available with 2, 3, or 4 outlets, one end expanded to coupling size, other end straight.

These are made from high quality type L copper.

Compax Valve = Screw Compression Pex Valve

Only Tool needed to attach pex is a wrench!

ASTM 876/877 F1807 Fittings

Part #'s

CVCX1005002 = 2 outlet Compax valve manifold

CVCX1005003 = 3 outlet Compax valve manifold

CVCX1005004 = 4 outlet Compax valve manifold

Just solder a 4 outlet and a 3 outlet together to get 7! Its just that easy! A great way to have multiple sizes available while only stocking three different sizes!
